PROFESSIONAL SUMMARY

Frontend & Mobile Architect with 10+ years of experience leading the design, development, and architecture of mobile and web applications, primarily in banking and fintech. Specialist in Flutter and Clean Architecture, with a track record of leading technical teams, defining development standards, and optimizing CI/CD pipelines. Combines architectural vision with hands-on execution to deliver scalable, maintainable, high-performance products in agile environments.

PROFESSIONAL EXPERIENCE

Ética — Frontend Mobile Architect

Asunción, Paraguay (Remote) | Jun 2025 – Present

- Define the technical guidelines and base architecture for the company's mobile and web projects, ensuring long-term scalability and performance.
- Lead technology decision-making and promote Clean Architecture standards across development teams.
- Design and maintain the CI/CD infrastructure to optimize delivery times.

Key features & achievements:

- Redesigned the Eko dashboard at both the UX and architecture level, applying Clean Architecture in Flutter.
- Upgraded the Banco Familiar project to the latest Gradle versions, ensuring API 35 compatibility and optimizing the build size to 16 KB.
- Built the new Banco Familiar Business Banking app from scratch using Flutter.
- Created a base Next.js template to accelerate web development for new projects.
- Implemented CI/CD pipelines with Codemagic (mobile) and Bitbucket Pipelines (web) for automated deployments.
- Implemented Dark Mode and a special "Albirroja" mode in the Eko application.

ITTI — Front End Architecture Lead

Asunción, Paraguay | Mar 2023 – May 2025

- Designed cross-cutting solutions for all frontend projects (mobile and web), reducing development time for new projects.
- Defined and oversaw the team's technical decisions, establishing development best practices.
- Led a dedicated team specializing in React Native and Flutter, delivering solutions for specific technical needs.

Solutions developed:

- Built a Flutter template with a Clean Code architecture and default Google and Huawei libraries, using Bloc for state management, so any new project could start fully configured.
- Implemented CI/CD for existing mobile projects with Codemagic and GitHub Actions, automating app store publishing.
- Managed the creation and setup of developer accounts on the Play Store and App Store, leaving the environment ready at project close.
- Trained development teams on technologies, architectures, and libraries, aligning development standards across the team.

Earlier role within ITTI — Mobile Developer:

- Started as a mobile frontend developer with Flutter, contributing to the ueno application and supporting other apps such as Wepa.
- Developed the transfers module, contacts module, and the SPI 2 CAS-Transfer flow, including alias creation.
- Developed the refunds module.
- Implemented Firebase analytics (Google and Huawei) in ueno and Wepa.
- Built "funnel"-style reports from analytics events.
- Implemented push notifications with In-App Messaging and integrated Instagram Stories into the dashboard.

- Implemented Huawei technologies independently within the app to ensure compatibility with AppGallery devices.

Ética — Frontend Developer

Asunción, Paraguay | Oct 2020 – Feb 2023

- Led the end-to-end development of the Eko application, from concept to market launch — a platform designed to make banking simple and secure for underserved users.
- Defined the product's vision, mission, and goals, prioritizing usability, accessibility, and positive user impact.
- Collaborated closely with designers and software architects to translate the product vision into a solid technical architecture and an intuitive interface, prioritizing scalability and security.

Roshka — Frontend Developer (BBVA project)

Asunción, Paraguay | Jan 2019 – Sep 2020

- Developed and maintained BBVA's retail banking app (now GNB).
- Built the EMA (Enterprise Mobile Application) business banking app from scratch in Kotlin.
- Built the Cooperativa Loma Plata application from scratch.
- Maintained the BNF application.

Exxis — SAP Developer

Asunción, Paraguay | Oct 2018 – Jan 2019

- Developed SAP add-ons using .NET and XML.

Universidad del Pacífico — Full Stack Developer

Asunción, Paraguay | Apr 2016 – Oct 2018

- Built the Treasury system, Cash Management system, and accounting module in Java Desktop.
- Maintained the academic system and built the Petty Cash system in PHP (CodeIgniter).
